Open access agreement

As a corresponding author affiliated with **Kryvyi Rih State Pedagogical University**, you can publish open access in many journals at reduced or no cost to you. Other information provided at submission, for example country, funder, or society membership, can also reduce the price.

Our data indicate that manuscripts submitted to journals suggested for transfer have a **50% higher acceptance rate** than manuscripts submitted to other journals. Also, transferred manuscripts are accepted about **10 days faster** on average than all submitted manuscripts. Please select one of the suggested journals below to transfer your manuscript.

Social Sciences & Humanities Open guarantees peer review of your transferred manuscript.

Journal Scope

Social Sciences & Humanities Open is an exciting new multidisciplinary, open access journal.

Social Sciences & Humanities Open (SSHO) is a fully open access scientific journal covering all areas of the social sciences, economics, and humanities. We adhere to the highest scientific standards by following a rigorous peer-review process. Any submission reporting scientifically accurate and valuable research will be considered for publication. We welcome empirical studies, theoretical articles, case studies, methodological articles and literature reviews.

Our scope is inclusive: we encourage multi- and inter-disciplinary work as well as new and experimental forms of research, replication studies and negative findings. All submissions will be evaluated based on their scientific and methodological validity and robustness of research. As an open access journal, all articles will be immediately and permanently available for authors and

readers to read, download, cite and share.

SSHO further aims to be a meeting point for researchers at every stage of their career. One of our guiding principles is to make the publishing process accessible to everyone doing sound science, including first-time authors, early career researchers, and those from underrepresented groups and geographical areas. In alignment with these principles, *SSHO*'s Editorial Board aims to reflect our commitment to diversity and inclusion.

Education

Journal Scope

The *International Journal of Educational Research Open* (IJEDRO) is a companion title of the (IJER). IJEDRO is an open access, peer-reviewed journal which draws contributions from a wide community of international and interdisciplinary researchers across the field of educational research. We seek contributions that present innovative application of theories, conceptual frameworks and research methodologies, and which inform research, policy and practice beyond the context in which the original work is undertaken.

The *International Journal of Educational Research Open* so so-named to reflect our international facing publication portfolio and readership. Contributions do not need to be comparative (in the sense of comparing aspects of education in different countries or cultures) or report research carried out in just one location or cultural setting. However, contributions to the *International Journal of Educational Research Open* need to be thought-provoking, contribute to the educational research field, and inspire international, interdisciplinary readership. Therefore, contributions must have the following features:

- Clear communication about the research findings or arguments
- Critical demonstration of how the literature critically relates to the topic researched
- Strong theoretical, conceptual or philosophical framing

- Clearly explained design and analysis, allowing replication of the study in other (international) contexts
- Critical analysis, recommendations and implications for further research, policy and practice in an international context

The journal supports equality, inclusion and diversity in research and education, within our editorial team, and among author and reviewer networks. As part of our commitment to open access and the values of inclusion, the journal encourages, in particular, early career researchers who take a fresh approach to research methodologies to submit their contributions, provided they support the journal's aims and scope.

IJEDRO will also accept evidence syntheses, but the research must have taken a systematic approach to the selection and presentation of evidence.

Subject Areas

Education

Journal Scope

Computers & Education Open (CAEO) is an open access, peer reviewed journal focused on the ways in which digital technology can enhance education. Like its highly-regarded companion title, *Computers & Education*, CAEO welcomes research papers on the pedagogical uses of digital technology where the focus is broad enough to be of interest to a wider education community.

In addition to empirical work, we welcome systematic reviews and meta-analyses that include clear research questions, a framework of analysis, and conclusions that reflect the aims of the paper. CAEO also offers the opportunity to publish special issues or sections to reflect current interest and research in topical or developing areas. We are also open to publishing research presented in innovative fashions, for example in multimedia formats, as well as papers which take an interdisciplinary approach.

Article Types

Experimental and Cognitive Psychology

Social Psychology

Journal Scope

Acta Psychologica is a peer-reviewed, open access journal that aims to publish articles relevant to all fields of psychology. Our papers serve as solid building blocks for a research field while still being accessible for readers outside this field.

The journal invites submissions from across all of Psychology. We have dedicated section editors from fields across psychology. Topics of interest include, but are not limited to Clinical and Health Psychology, Cognition, Individual Differences, Industrial and Organizational Psychology, Language Psychology, Lifespan Development, Psychology and Technology, Educational Psychology, Sport and Exercise Psychology, and Social Psychology. We aim to continuously add fields where the need arises. We welcome research & replication studies, review articles, meta-analyses, and registered reports.

Proposals for special issues should be sent to our special issue editor, who can be reached at ACTPSY@elsevier.com (please note Special Issue Proposal in the message title). The journal embraces all aspects of open science and, to that end, researchers are encouraged to preregister their studies and/or share their data.

Human-Computer Interaction

Journal Scope

Computers and Education: X Reality (CEXR) affords a platform for researchers, developers, and educators to publish their research progress, share novel research ideas, and demonstrate pedagogical innovation on topics relating to mixed reality for educational purposes. In particular, CEXR is interested in immersive learning, personalized and adaptive learning, smart education, and interactive learning. CEXR's scope includes topics such as the following:

- VR/AR/MR in e-learning systems

- Collaborative learning in VR/AR/MR environments
- Multiuser and distributed VR/AR/MR learning systems
- The social, business and human aspects of the virtual world for education
- Usability and user experience in the virtual world for education
- Human-centred and learner-centred virtual learning
- 3D interaction for VR/AR/MR for education
- Artificial intelligence, IoT, Big data in VR/AR/MR e-learning applications
- Immersive gaming and VR/AR/MR-driven edutainment
- Virtual environments for surgical, medical, and safety education
- Virtual reality and Art technology for education
- Ethical issues in VR/AR/MR for education
- Mobile VR/AR/MR educational solutions
- VR/AR/MR hardware/devices/infrastructure for education and training
- Applications of haptics technologies for teaching and learning innovations
- Spherical video-based virtual reality for teaching and learning
- VR/AR/MR software applications for education and training
- Blockchain and NFTs applications in the Metaverse for education
- VR/AR/MR techniques for smart campus
- The integration of virtual communities (e.g., social media, online communities, and/or VR/MR/AR) for education
- User experience and interface design issues for educational experiences in VR/MR/AR and the Metaverse
- The integration of VR/MR/AR and the Metaverse with traditional classroom learning
- Exploring how VR/MR/AR and the Metaverse can make education more accessible to students with different needs and abilities

Article Types

1. Research Paper
2. Review Paper
3. Position Paper
4. VSI: Immersive XR
5. VSI: Language Education and XR
6. VSI: XR design in Education
